

A SLEEKER, FASTER, RECHARGEABLE Laser Rangefinder

The GOLFBUDDY Quantum is smaller and the measurement speed is faster. It is compact, light, and small enough to fit in your pocket. With Zero Second Technology, the measurement speed is ONLY 0.15 seconds.

- Range: 2-800 metres (2-880 yards)
- Rechargeable Li-ion battery (5000 uses per charge)
- Faster measurement speed with ZST technology
- 7x magnification with high transmittance LCD
- Sleek, compact design 95 x 47 x 36.5 mm (3.37 x 1.9 x 1.4 inch.)
- Weight: 143g (45 oz)
- Accurate measurement with vibration alert (vibrate function)
- Luxurious ivory leather magnetic case included
- The slope on/off functionality provides slope-adjusted distances for elevation
- IPX4 water-resistant
- USGA / R&A legal for handicap & tournament play

Zero Second Technology

The GOLFBUDDY Quantum features lightning fast readings using Zero Second Technology. When activated, the rangefinder will give measurement readings within 0.15 seconds to your acquired target.

Rechargeable

Included in the box is a USB Type C charging cable that allows you to charge your device after 5000 uses. No need to keep buying batteries.

7x Magnification

The 7x magnification lens makes finding the target simple. View the yardage on the clear, easy-to-read wide LCD display.

IPX4 Water Resistant

The Quantum is IPX4 splash proof rated, meaning it is suitable for use in light rain. Submerging in water is not recommended.

Slope Adjusted Distances

The slope adjustment feature shows you the normal yardage PLUS the slope adjusted 'true' yardage distance, taking into consideration any incline or decline you are facing. It can easily be turned off for tournament play and used under USGA / R&A regulations.
